

COMPRESSION SOFAS CATALOG

2026 KINGSEN

Established: 2006

Annual sales: \$15,000,000

Employees: 100+

Production line: 6

Factory area: 55,000m²

Annual capacity: 200 40HQ

About KINGSEN:

NINGBO KINGSEN specializes in the manufacturing of compressed sofas and polyurethane foam products, integrating R&D, design, production, and sales. With over 20 years of development, KINGSEN has grown into an international company with more than 100 employees, a total plant area of 55,000 square meters, and annual sales exceeding USD 15 million.

We have a complete set of foaming machinery, fixture lines, computerized sponge cutting machines, automatic adhesive machines, compression equipment, and testing instruments to enhance our technical capabilities. KINGSEN continues to innovate and design more than 100 new products every year. Our compression technology reduces sofa packaging volume, saving up to 80% on shipping and warehousing costs. End users can easily restore the sofa to its original shape with no assembly. At the same time, we continuously strengthen internal quality control management to ensure consistent product excellence. Our company is certified by BSCI and ISO9001:2015. Our products passed OEKO-TEX Standard 100 and UK fire protection reported, the materials all meet CertiPUR-US, EN71, and CE standards.

Our partners span more than 100 countries and regions worldwide, including the United States, Europe, Australia, Japan, and many others. With strict quality control and an efficient process, we have earned the trust and long-term cooperation of major supermarket chains, home furnishing retailers, and leading e-commerce platforms.

Our facility is located in Ningbo City, Zhejiang Province—just 30 minutes from Ningbo Airport and two hours from Shanghai Pudong Airport. We warmly welcome you to visit our factory for business discussions and look forward to establishing a successful partnership with you.

Welcome You Visit Our Factory

Save 80% Shipping Costs

Compression and Roll-Up Machinery Integration

Our advanced compression technology significantly reduces sofa packaging volume, enabling clients to achieve substantial savings on 80% shipping and logistics costs. End users can effortlessly restore the sofa to its original shape in just a few simple steps—no complex setup or lengthy instructions required.

Large volume

Vacuum compression reduces volume
